DIAPHRAGM GAS METER

Gas Meter for Family

- GTG-G1.6 ■ GTG-G2.5
- GTG-G4

The Remote Gas Meter

- GTG-G6-0 ■ GTG-G6-1
- GTG-G6-2

Automatic Meter Reading System
Automatic Meter Reading System

The Certification Company to ISO 9001, ISO 14001

Diaphragm Gas Meter

G-TEC's Diaphragm Gas Meter - a precision gas meter that satisfies OIML R31 standards.

Measurable gas of diaphragm gas meter GTG series

City Gas / LPG / Natural Gas / Rustless Gas

Special feature of diaphragm gas meter GTG series

Structural Stability

High durability with stable intrinsic error control by maintaining consistent mechanism angles, allowing smooth operation and reducing pressure loss. This is made possible thanks to the modification of process, changing from soldering on the actual mechanism part to injection.

High Durability

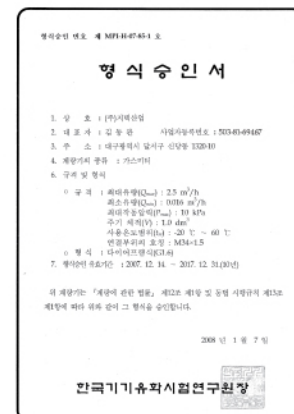

Superior durability through the prevention of future changes of assembly parts by stabilization method after assembling finished product.

Environment Friendly Manufacturing Process

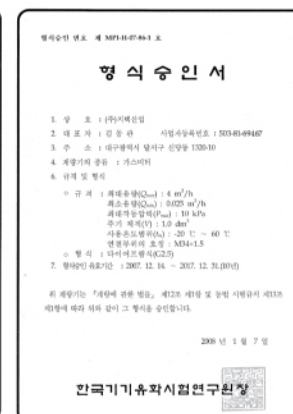

Realizing an environment friendly system by removing harmful processes, including soldering and ultrasonic fusion.

Automatic Meter Reading System(G1.6, G2.5, G4, G6)

The automatic meter reading system is a detachable remote controlled gas meter equipped with an external pulse generating device.

The feature of Automatic Meter Reading System in GTEC's

- Highly sensitive lead switch and high-strength magnet allow for accurate and precise long distance reading.
- Remote control reading system through circuit excluding remote control panel is available. External transmitter is attachable.
- Remote controlling control panel can be measured accurately through a high function micro-processor. Long-term use of over 5 years is available through low power circuit design. Measured value is preserved permanently, though power cannot be supplied.

Control Panel Spec.

| Sort | Spec. |
|---------------------|-------------------------------------|
| Use | Particular remote instruction (G/M) |
| Minimum instruction | 0.01 m ³ |
| Maximum instruction | 99,999.99 m ³ |
| The power supply | Lithium battery 3.6V |
| Usable temperature | -20 ~ 60℃ |
| Usable period | Over 5years |

Installation Notes

- Keep away from sun rays, wet, vibrating areas.
- Select a location that will allow for easy installation and checkups. Be sure to allow sufficient space. Connect cables in accordance with the installation manual. - 2P for control panel. (Tin plating, #24)
- Please use a contraction tube to remove causes of breakage due to condensation after connecting each cable.
- Any voluntary operation may cause a breakdown.
- Do not voluntarily disassemble or repair any product with an error when installing or setting up.
- After installing control panel, seal the finish.

An appearance flood control.
